

# Managed Security Platform Backup and Data Recovery

The Easiest, Fastest and Safest Way to Reliably  
Backup all of Your Important Information

Never Worry About Losing Critical Data Again.

**Resolutions Managed Security Platform - Backup and Data Recovery** ("ResolutionsMSP - BDR") is an automated data backup and restoration system providing powerful tools to protect your organization's data. Unlike traditional data protection tools, **ResolutionsMSP - BDR** does not require any human assistance beyond the initial installation and setup. There is no media to install, remove, protect, or replace. **ResolutionsMSP - BDR** is highly secure and only you have access to your information and data. We call it, eSafe, eSimple, and eSecure!

Your valuable data is encrypted and stored at an **ResolutionsMSP - BDR** secure data center. Without your password, no one else can read or use your confidential information. Not even the staff at **ResolutionsMSP - BDR**.

## How Does **ResolutionsMSP - BDR** Work?

Install a small **ResolutionsMSP - BDR** client software application on your computer to manage all of your data protection and restoration. After you easily identify what data you want to protect, **ResolutionsMSP - BDR** encrypts and compresses this data and then transfers a master copy to an **ResolutionsMSP - BDR** data center.

During the 10-minute setup you will be asked to choose a password and a passphrase. The password protects access to your account and the pass phrase protects your data. Your unique passphrase becomes part of your **ResolutionsMSP - BDR** encryption algorithm. Each time you change a file, **ResolutionsMSP - BDR** detects the change, encrypts and compresses the revision and sends it to a **ResolutionsMSP - BDR** data center to be stored with the master copy of your file. Unlike our competition, you determine what files and folders to backup and you can set different backup procedures on a file-by-file basis. **ResolutionsMSP - BDR** does not care if

302-798-3509

the file is located on your computer or somewhere else on your network. You simply point and shoot and **ResolutionsMSP - BDR** does the rest.

Our easy-to-use system lets you decide how often to backup and how many previous versions of your data to keep. Our technology optimizes the storage of data and versions, to minimize the amount the amount of storage required, by employing a change or "delta only" approach, subsequent to the initial backup. You can even ask **ResolutionsMSP - DR** to help you when data is destroyed by mistake. **ResolutionsMSP - BDR** will maintain copies of files you have deleted for the period of time you determine preventing accidental deletions. It becomes your personal Data Deletion Insurance Policy.

## How Does **ResolutionsMSP - BDR** Restore My Data?

The **ResolutionsMSP - BDR** client has all the capabilities to restore your data when and where you want it. You simply launch the **ResolutionsMSP - BDR** Restore Wizard and follow the simple yet powerful directions. Your choices are endless. The only limitations are your data bandwidth and your imagination.

## Who Needs **ResolutionsMSP - BDR**?

Everyone! Laptop users. Any sized business. Home computers. Anywhere you store critical information that you can't afford to be without. Studies have shown that the majority of PC users don't back up their critical data on a regular basis but would be greatly inconvenienced if they ever lost their data. If you are looking for an easier and more reliable way to backup your data, then you need **ResolutionsMSP - BDR**.

The screenshot shows the ResolutionsMSP software interface. The title bar reads "ResolutionsMSP - Backup and Data Recovery". The main window has a sidebar on the left with icons for System Status, Control Panel, My Account, Folders, Schedule, and Options. The main content area is titled "System Status: Backup Status" and includes a "Backup Now" button, a progress bar for "All Accounts", and a "System Log" table. The log table has columns for Date and Time, Type, Errors, Warnings, and OK.

Date and Time	Type	Errors	Warnings	OK
Fri Jun 01, 2007 03:30 AM	Backup	0	0	76,481
Thu May 31, 2007 03:30 AM	Backup	0	0	76,884
Wed May 30, 2007 03:30 AM	Backup	0	0	77,092
Tue May 29, 2007 03:30 AM	Backup	0	0	77,031
Mon May 28, 2007 03:30 AM	Backup	0	0	76,831
Sun May 27, 2007 03:30 AM	Backup	0	0	76,917
Sat May 26, 2007 03:30 AM	Backup	0	0	76,896
Fri May 25, 2007 03:30 AM	Backup	0	0	76,887

## What **ResolutionsMSP - BDR** Delivers...

### Simple

- ▶ **Easy Installation** – All of the technology required for easy secure data backup is installed and configured in minutes. No additional hardware to install, maintain or learn how to use.
- ▶ **Backup From Anywhere** – Secure backups can be accomplished from any Internet connection.
- ▶ **Anytime Access** – Access to your stored data anytime from any place with an Internet connection. Recovery of lost files is fast and easy.
- ▶ **Minimum Effort, Minimum Time** – Quick and easy backup is accomplished by only moving the changes you made to your protected data each time you back up.
- ▶ **Flexible Version Control** - Provides unmatched flexibility in storing multiple versions of the same document. Definable down to the individual file. Easy to recover a previous version.

### Safe

- ▶ **Secure Off-Site Storage** – A redundant copy of all of your critical information is stored in the secure **ResolutionsMSP - BDR** data center. If your system crashes or your laptop is stolen, your important information is still safe and easily restored at any time day or night.
- ▶ **No Hardware to Fail or Maintain** – No bad media, broken tape drives, misplaced tapes, lost or full thumb/USB drives or faulty CD drives. Your secure backup process is completely software driven and your backup is stored off-site without the hassle of putting tapes or CDs in another location.
- ▶ **Automated Process** - Be sure your data is being backed up correctly with our easy to use automated system. No operator error or forgotten backups. You even receive automatic reminders if you forget to backup your data.

### Secure

- ▶ **256 bit Encryption** – All of your information is automatically encrypted based on your private password prior to being transmitted to a secure **ResolutionsMSP - BDR** data center.
- ▶ **Only You Have Access** – Without your password, the stored information cannot be read or used by anyone else including **ResolutionsMSP - BDR** staff. Only you have access to your stored data.
- ▶ **Changes Only** – Once your encrypted information is stored in a secure **ResolutionsMSP - BDR** data center, only the encrypted changes to your data are transmitted to insure the fastest performance. This process guarantees that the information sent is meaningless to anyone but you and your encrypted **ResolutionsMSP - BDR** account.
- ▶ **HIPAA and Sarbanes-Oxley Compliant** – Meets or exceeds all the security requirements of most major security guidelines, policies, and regulations.

## What You Don't Get With **Resolutions Managed Security Platform - BDR**...

- ▶ Complicated Backup procedures interrupting your daily business activities.
- ▶ Backup media to lose, misplace or fail.
- ▶ Required transportation of backup media to a remote storage facility.
- ▶ Lost sleep wondering if your back up will really help you if you need it.

## Feature List

- ▶ Easy to follow installation Wizard.
- ▶ Easy to use client software.
- ▶ Automatic backups are easy to schedule.
- ▶ Low Bandwidth requirements.
- ▶ Flexible version control to define which versions to store.
- ▶ Unmatched encryption and security.
- ▶ Backup individual files or entire directories with ease.
- ▶ Easy to use Recovery options – Just follow the Recovery Wizard.
- ▶ All data is compressed and encrypted locally before being sent to the server.
- ▶ All data on the server is stored in a compressed and encrypted format.
- ▶ Consolidated management of multiple PCs.
- ▶ Supports the backup of local files and network files
- ▶ Powerful file policy for selecting which files to include, exclude, etc.
- ▶ All data stored on the server is compressed to minimize storage space.
- ▶ Constantly displays the storage space used.
- ▶ Detailed audit trail - each and every backup includes a detailed electronic audit.
